

HBOT CHAMBER TECH / SINCE 2007 / 2026

CITY TECH

The architecture of
connected care.

A product lookbook for wellness, clinical
and hospitality projects.

A chamber belongs in the space.

HBOT City Tech is designed to become a considered part of a wellness room, clinic or hospitality project - not simply a device placed inside one.

Connected technology, composed finishes and a clear choice of scale give every project a more intelligent starting point.

Five systems. One considered experience.

01

CITYCONNECT

Connected device management and remote monitoring.

02

CITYOS

Touchscreen control and continuous OTA updates.

03

CITYAI

A data-informed optimisation framework.

04

CITYSYNC

Integration-ready workflows and reporting.

05

CITYGUARD

Predictive maintenance and digital safety logs.

CityConnect mobile monitoring plus Apple Health, Google Fit and Huawei Health support are on the roadmap and will be announced separately.

THE TECHNOLOGY BEHIND THE EXPERIENCE

Connected by design.

CITYCONNECT

24/7 cloud connection, remote device visibility and alert pathways.

CITYOS

Touchscreen control, OTA software updates and evolving language support.

CITYAI

A data-informed framework for dynamic session optimisation.

CITYSYNC

Integration-ready workflows, automatic reporting and hospital-system direction.

CITYGUARD

Predictive maintenance, encrypted safety logs and service-aware monitoring.

Built to keep the chamber experience visible, current and prepared for what comes next.

One family. Six ways to scale.

01	OSLO	1 person / lying position
02	DUBAI	1 person / seated
03	TOKYO	2 people / seated
04	TOKYO PLUS	2-4 people / institutional
05	MILANO	4 people / premium cabin
06	GENEVA	6+ people / hospital-grade

Capacity, position and pressure range change. The connected City Tech platform remains at the core.

OSLO / HBOT CITY TECH

Oslo

Excellence in a lying position.

For a calm, fully lying experience - with the comfort and proportions that longer sessions call for.

1 PERSON / 1.3-1.5 ATA / 200x80 CM BED

OSLO

A single-person chamber developed around a medical orthopaedic bed and a quieter, more composed in-room presence.

CAPACITY

1 person / lying

CONSTRUCTION

Aviation-grade aluminium

SAFETY

Dual safety valve

SOUND

<60 dB CitySilent

OSLO / TECHNICAL PROFILE

**Technical
profile.**

HBOT CHAMBER TECH

DUBAI / HBOT CITY TECH

Dubai

Personal, composed, connected.

A compact chamber for individual HBOT projects where a strong product identity and a compact footprint matter equally.

1 PERSON / 1.3-1.5 ATA / TOUCHSCREEN

DUBAI

A fully equipped single-person direction for selected private spaces and clinical environments.

CAPACITY

1 person / seated

CONTROL

Touchscreen

DIMENSIONS

120x110x180 cm

SAFETY

Dual safety valve

DUBAI / TECHNICAL PROFILE

**Technical
profile.**

HBOT CHAMBER TECH

TOKYO / HBOT CITY TECH

Tokyo

Shared space, considered.

A two-seat chamber that brings the experience of togetherness, visibility and clear interaction into one sculptural form.

2 PEOPLE / 1.3-1.5 ATA / PANORAMIC WINDOW

HBOT CHAMBER TECH

TOKYO

Designed for partners, couples or a patient-companion setting
- with a panoramic window and a dual control system.

CAPACITY

2 people / seated

OXYGEN PURITY

93-95%

CONTROL

Dual control system

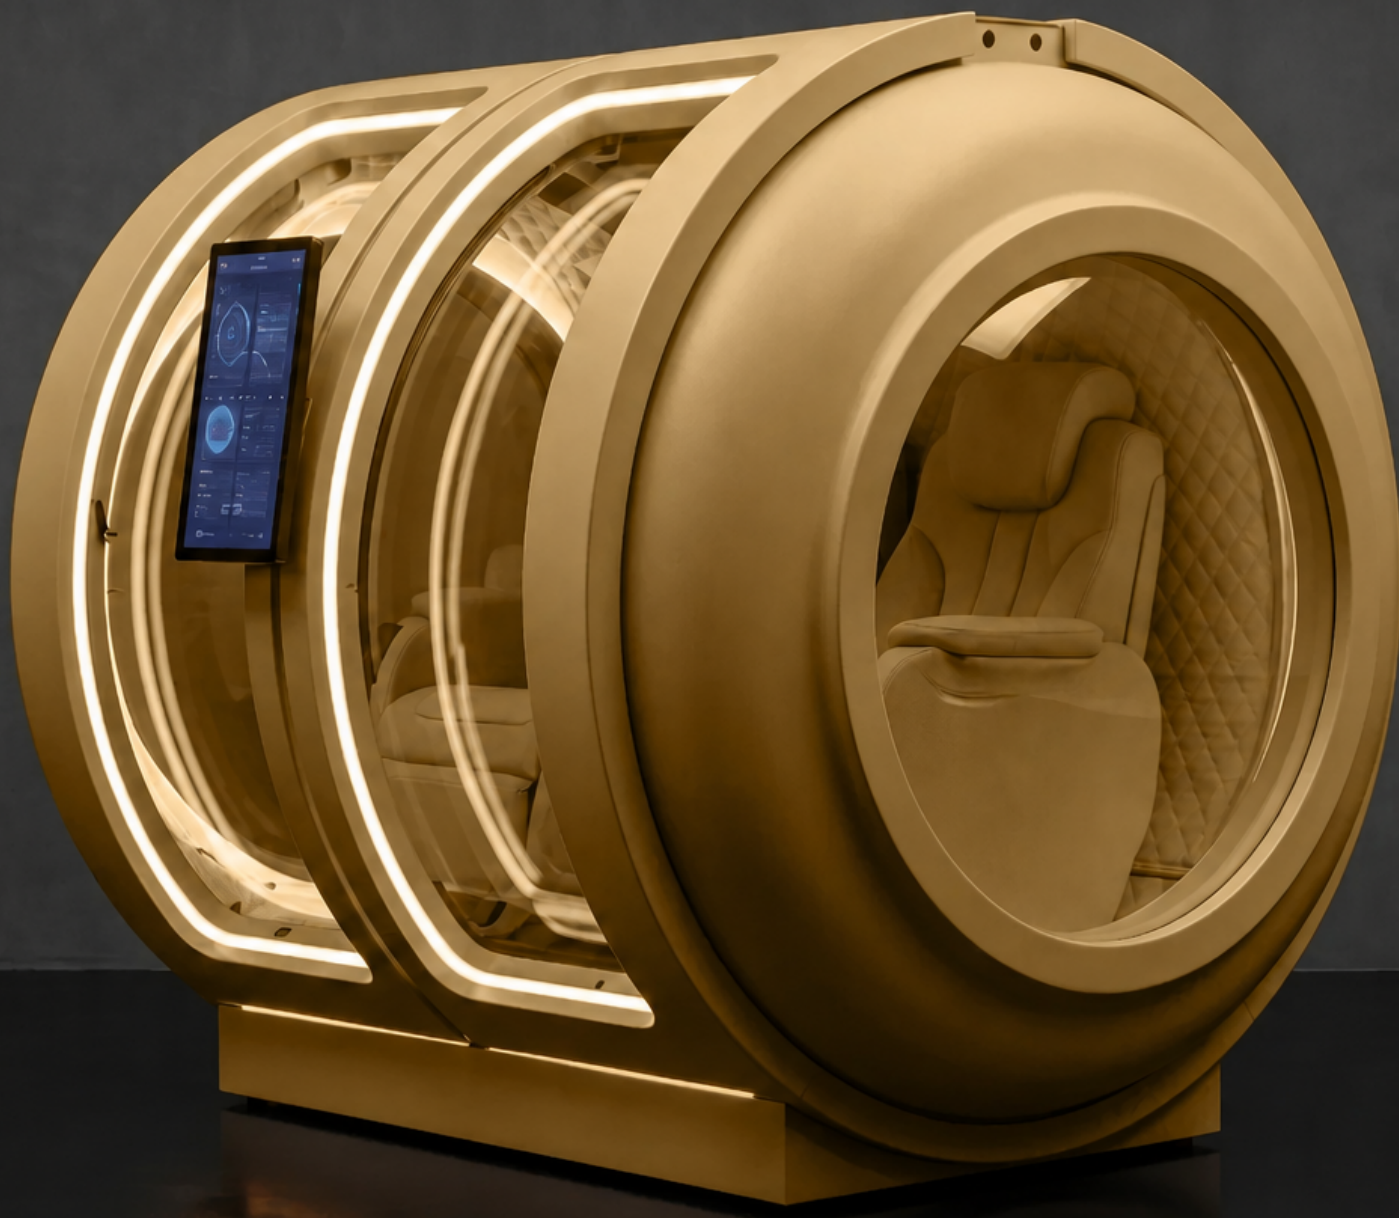

SAFETY

Emergency valve

TOKYO / TECHNICAL PROFILE

**Technical
profile.**

HBOT CHAMBER TECH

TOKYO PLUS / HBOT CITY TECH

Tokyo Plus

Designed to expand.

The institutional Tokyo direction: a more ambitious seating capacity for spaces that need to move beyond the individual session.

2-4 PEOPLE / 2.0-3.0 ATA / INSTITUTIONAL

HBOT CHAMBER TECH

TOKYO PLUS

For clinics, hospitals and wellness centres that require expandable, multi-person capacity with an elevated design language.

CAPACITY

2-4 people / tiered

PRESSURE

2.0-3.0 ATA

OXYGEN PURITY

93-95%

USE CASE

Clinic / hospital / wellness

TOKYO PLUS / TECHNICAL PROFILE

**Technical
profile.**

HBOT CHAMBER TECH

MILANO / HBOT CITY TECH

Milano

The premium four-person cabin.

A spacious cube-form interior, quilted surfaces and warm LED ambience make Milano the visual centrepiece of the City Tech range.

4 PEOPLE / 2.0-6.0 ATA / PREMIUM CABIN

MILANO

A four-person statement for hospitality and high-end wellness environments, designed to be experienced as much as specified.

CAPACITY

4 people / seated

INTERIOR

Quilted leather + LED ambience

CONTROL

Independent control unit

SAFETY

Emergency valve

MILANO / TECHNICAL PROFILE

**Technical
profile.**

HBOT CHAMBER TECH

GENEVA / HBOT CITY TECH

Geneva

Hospital-scale, modular by design.

A large-capacity chamber for high-volume institutions where modular expansion and advanced monitoring are part of the brief.

6+ PEOPLE / 3.0-6.0 ATA / HOSPITAL-GRADE

GENEVA

A hospital-grade platform conceived for the requirements of busy treatment centres and long-term operational planning.

CAPACITY

6+ people / seated

BUILD

Hospital-grade

EXPANSION

Modular-ready

SAFETY
